

Immunization and Health Requirements for Clinical Students

Please start on this process early as it could take up to 6 months to complete requirements.

☐ **Signed AAMC Standardized Immunization Form**

Access the form using this link: [AAMC Immunization Form](#). This form must be completed and signed by a licensed healthcare professional or designee, such as your primary care provider (PCP) or your Student Health Clinic.

☐ **2 Measles-Mumps-Rubella (MMR) Vaccines OR Positive Titer**

If submitting serologic proof of immunity (titer), a copy of the lab report is required.

☐ **Tetanus-Diphtheria-Pertussis (Tdap) Vaccine**

One (1) dose of adult Tdap is required. If last Tdap is more than 10 years old, you must receive another Tdap vaccine.

☐ **2 Varicella (V) Vaccines OR Positive Titer**

If submitting serologic proof of immunity (titer), a copy of the lab report is required.

☐ **Hepatitis B Vaccine Series AND Quantitative Hepatitis B Surface Antibody Titer**

The titer is required even if you had the Hepatitis B vaccines as a child or adult. A copy of the lab report is required. Hepatitis B series given in childhood is usually 3 doses, meaning we should be provided 3 dates when hepatitis B vaccine was received. Hepatitis B in adulthood can be completed as a 3 dose OR 2 dose series.

If the titer is non-reactive, you must start a new Hepatitis B vaccine series as soon as possible. To ensure the Hepatitis B requirements are completed prior to the start of school, the two (2) dose series (Heplisav-B) is preferred. After the first dose of Heplisav-B, a second dose is given 4 weeks later followed by a titer four weeks after the second dose.

☐ **Meningitis Vaccine**

One (1) dose of meningitis vaccine is required for students that are **21 years of age or younger**. The vaccine must be administered within the past 5 years **and** at least 10 days prior to the first day of classes/orientation.

☐ **Tuberculosis Screening**

One (1) negative TB screening (IGRA blood test with QuantiFERON TB Gold or T-spot preferred; will accept skin testing with PPD) on or after January 1st of the current year is required.

If you have a history of positive tuberculosis testing, you must:

- Document the date of your positive result
- Complete a chest x-ray on or after January 1st of the current year (a copy of the report is required)

- Submit documentation from your provider that you have been counseled on your results and Latent TB Infection (LTBI)
- If you have been treated for LTBI, this documentation from your provider should be included.

➤ **Please enter your immunization documentation into this Red Cap Survey:**

<https://ais.swmed.edu/redcap/surveys/?s=8TLHKXY3XHDF8CFA>

- Keep a record of your Red Cap survey return code – you will need this go go back into your record to submit more immunization information at a later date.
- If your file is not yet complete, you are encouraged to submit vaccine/titer information into the REDCap survey. You can return at any time to upload additional documents or make updates using your return code.
- If you are submitting proof of vaccines that are not included in the AAMC form then vaccine information must be complete:
 - Pharmacy or clinic name
 - Student's full name
 - Student Date of Birth
 - Vaccine name
 - Date vaccine was administered

***Not Required:** Current influenza vaccine (we will offer you flu vaccination in the fall), COVID-19 vaccines, or physical exam.

All immunization requirements must be met prior to the start of orientation. Immunizations and testing may be obtained from your current Student Health Services, private physician's office, city/county health department, urgent care, or other clinics of your choice. Please start this process early as it can sometimes take up to 6 months to complete all of these requirements.

- Please call Student Health at 214-645-8690 if you have any questions regarding the required immunizations and necessary documentation for your safe participation in school.
