

January 4, 2006

MEDICAL EDUCATION & CONFERENCE CENTER (NG3) ROOM 112

1:00 - 5:00 P.M.

INTRODUCTION

1:00 P.M.

FEATURED SPEAKERS:

JONATHAN Terman, Ph.D.

*Center for Basic Neuroscience
The Molecular Mechanisms of Axonal Growth, Guidance,
and Regeneration*

SANDEEP BURMA, Ph.D.

*Radiation Oncology
The Cellular Response to DNA Breaks*

ANDREW FERANCHAK, M.D.

*Pediatrics
Role of Purinergic Signaling in Hepatobiliary Function*

JENNY HSIEH, Ph.D.

*Molecular Biology and Cecil H. and Ida Green Center
for Reproductive Biology Sciences
Epigenetic Regulation of Adult Neurogenesis*

F. ANDREW KOZEL, M.D., M.S.C.R.

*Psychiatry
Investigating Brain Circuits with Neuroimaging &
Brain Stimulation*

ONDINE CLEAVER, Ph.D.

*Molecular Biology
Vascular Development and
Endothelial Signaling*

STEVEN ALTSCHULER, Ph.D.

*Pharmacology
Cytological Profiling*

BREAK

3:00 P.M.

JAMES AMATRUDA, M.D., Ph.D.

*Pediatrics
Genetic Approaches to Cancer Gene Discovery*

XIAN-JIN XIE, Ph.D.

*Center for Biostatistics & Clinical Science
Testing Treatment Effect on Binary Outcome:
Is Your Model Adequate?*

JEFFREY BROWNING M.D.

*Internal Medicine
Hepatic Steatosis: Epidemiology and Pathogenesis*

LAWRENCE LUM, Ph.D.

*Cell Biology
Deciphering Signal Transduction Networks in the
Genomics Age*

LANI WU, Ph.D.

*Pharmacology
The Design Principles of Yeast Polarization*

BENJAMIN PING-CHI CHEN, Ph.D.

*Radiation Oncology
The Significance of DNA-PKcs Phosphorylation in
Cellular Response to DNA Damage*

CHRISTINE GARCIA, M.D., Ph.D.

*McDermott Center for Human Growth & Development
Inherited Pulmonary Diseases*

UT Southwestern Medical School

and

UT Southwestern Graduate School of
Biomedical Sciences
